## Instructions

1. Cut two 9"x12" pieces from the smoke chevron. Iron fleece to the backs of both pieces.

3. Cut a 1-1/2" square from each bottom corner of interfaced bag body. *Figure A*
4. Position the buckle belt 2" from the bottom and tack in place.
5. With right sides of bag body together, sew the sides and bottom together. *Figure A*
6. With right sides still facing, take the hair elastic and pinch it to form two loops (making sure one loop is approximately 1"). Using a zigzag stitch, sew to the top back panel ¼" from the edge, going over your stitches a few times to secure it. *Figure B*
7. To box bottom corners, match each side seam of bag body with the bottom seam; stitch across resulting straight edge. *Figure C*
8. Turn bag body right side out and hand-stitch button to front of bag.
